EDUCATION

Singapore Management University Aug. 2023 - Apr. 2027
BSc Computing and Law GPA: 3.53/4.00
• **Awards:** SMU Global Impact Scholarship • **Research:** SMU YPHSL, *Hercules in Silico* (Asst. Prof. Jerrold Soh)

Korea University Dec. 2025, Dec. 2026
International Winter Campus 2025, 2026
• **Coursework:** Advanced Database System (Relational, OO, NoSQL)

EXPERIENCE

Temasek, Singapore: *Full Stack Engineering Intern* Aug. 2026 - Dec. 2026

- Built a distributed AI agent system on a custom **LiteLLM** and **Amazon Bedrock** agent harness, integrating internal **Microsoft 365 Suite** tooling to reduce employee workflow time by **35%**.

Ministry of Home Affairs, Singapore: *Artificial Intelligence Engineering Intern* May. 2026 - Jul. 2026

- Implemented a multi-agent swarm in **FastAPI**, **Docker** and **Azure Container Apps** to orchestrate **6** per-run, sandboxed NanoClaw volumes for E2E full-stack app development, cutting prototype delivery time by **92%**.

Elefant, Singapore: *Full Stack Engineering Intern* Jan. 2026 - May. 2026

- Engineered a Medallion ETL pipeline in **Scrapy** and **Playwright** with **52** Spiders across **17** jurisdictions, deployed on **GCP Cloud Run Jobs** to cover **61K+** legal documents across **MongoDB** and **Elasticsearch**.
- Shipped a **26**-tool MCP Server for cross-store document auditing to cut incident triage time from **30min** to **2s**.

WhyHow.AI, San Francisco: *Backend Development Intern* Aug. 2025 - Dec. 2025

- Architected a multi-agent ETL pipeline using **Python** and **Pydantic AI** to detect emergent harms across **50,000+** PubMed abstracts, reducing manual review time by **60%**.

Custom Automated Systems, Singapore: *Software Engineering Intern* May 2025 - Aug. 2025

- Developed a RAG-based refinement engine with **TypeScript**, **Hugging Face** and **WebGPU**, improving query accuracy by **25%** across **7,500+** profiles with a **40%** reduction in average response latency.

Elefant, Singapore: *Data Engineering Intern* Sep. 2024 - Dec. 2024

- Built **CI/CD** pipelines in **Python** and **GCP** that automated end-to-end data extraction, enrichment, and validation workflows, reducing data processing effort by **65%** and improving data reliability.

SKILLS

AI: Agent Orchestration, MCP, RAG, Context Management, Evaluation, LangChain, Pydantic AI, Hugging Face
Frontend: React, Next.js, React Native, Flutter, Electron.js
Backend: Python, TypeScript, Go, SQL, Node.js, Rust
Infrastructure: Docker, Kubernetes, GCP, AWS, GitHub Actions, Supabase, MongoDB, Pinecone, Cloudflare
Product: Product Discovery, PRDs, Product Metrics
Legal: Intellectual Property Law, Privacy & Data Protection Law, Company Law, Contract Law

AWARDS & COMPETITIONS

SMU LIT Hackathon 2025 Sep. 2025
1st Place (Ministry of Law Track 2)

HackOMania 2025 Feb. 2025
GeeksHacking Choice Award

YouthTechSG YouthxHack 2024 Aug. 2024
1st Place (Digital Defence Track)
